C. DEFINITIONS (Continued)

Call Forwarding Fixed Destination – This service forwards incoming calls to another (pre-designated) directory number. Call Forwarding Fixed Destination is activated and deactivated by the subscriber. The pre-designated call forwarded directory number is setup by the telephone company.

Call Forwarding Remote Access – Allows you to program your home phone from a remote location to call forward to a number that you assign.

Call Waiting – This feature allows a subscriber engaged in an existing call to be given an indication that another caller is attempting to obtain a connection to the engaged subscriber. The called subscriber receives call waiting tone and the calling subscriber receives audible ringing or a recorded announcement followed by audible ringing. The called subscriber can then choose whether to answer the call (therefore placing the existing caller on hold) or remain with the current caller and ignore the new caller.

Call Waiting ID – Enables a customer to identify an incoming caller when the customer is already on the phone by displaying the caller's name and telephone number on the Caller ID display.

Call Waiting Deactivation – This feature allows a subscriber with the Call Waiting feature enabled and invoked to disable the Call Waiting feature for the duration of a call. It is activated by dialing a feature access code prior to placing a call, and is automatically deactivated when the subscriber disconnects from the call.

C. DEFINITIONS (Continued)

Caller ID Name Delivery – Allows for the automatic delivery of a calling party's name to the called customer. The name is displayed on customer premise equipment. The name displayed shall be the name associated with the calling telephone number as shown on the Company's records. The Company, in its discretion, may abbreviate or limit that name for display purposes. The Company does not assure name accuracy, and it shall not be liable to any party for errors, omissions or mistakes. The Company's sole and only obligation shall be to reasonably correct errors in names when notified in writing of such errors. If the calling directory name is marked "private", the customer with Calling Name Delivery sees a "P" on their display. If the name is unavailable for any other reason, an "O" is displayed.

Circular Hunting – In circular hunting, the switch has the ability to remember the last line it connected, and starting there, it hunts down to the next available line. Once the last line in the hunt group is reached, it rolls to the top or the first line in the hunt group. It does NOT continue to roll after completion of loop. Essentially, the available lines are searched for in a circle. *Note: All lines in the hunt group MUST have hunting on them because circular hunting rolls to the top or first line again.

Distinctive Ringing – A central office based service which provides up to three distinctive ringing codes on incoming calls, using one individual access line. The distinctive ringing codes are achieved by assigning up to three additional telephone numbers to the access line. Two types of Distinctive Ringing are available:

Type A: The above service without a directory listing.

Type B: The above service with a directory listing.

C. DEFINITIONS (Continued)

Fax/Value/Teen Line – Allows the subscriber to have a second directory number on the same line. Calls to the second number are indicated by a distinctive ring.

Message Waiting Indication – This feature allows a subscriber to hear a special (stutter) dial tone when they go off-hook and a message is waiting. This feature is used as an enhancement to voice mail services.

Selective Call Acceptance – This feature allows a subscriber to reject calls from any party that is not programmed on the subscriber's Selective Call Acceptance list.

Selective Call Forwarding – This feature allows a subscriber to forward calls from any party that is programmed on the subscriber's Selective Call Forwarding list. The subscriber with Selective Call Forwarding active receives a ring reminder each time a call is forwarded, but cannot answer the ring reminder.

Selective Call Rejection – This feature allows a subscriber to reject calls from any party that is programmed on the subscriber's Selective Call Rejection list. Rejected calls are routed to the Selective Call Rejection intercept treatment.

Selective Distinctive Ring – An incoming management feature that allows the subscriber to define a list of calling directory numbers that provides the subscriber with special incoming call treatment. Any incoming calls on this list are indicated by a distinctive ringing pattern. Terminating calls from directory numbers which are not on the list or which cannot be identified, are given standard treatment.
